## PROJECTS

Project Name: Online vehicle rental system([ViewProject](#))

Tools:

- FrontEnd: React , Tailwind CSS
- BackEnd: Node JS, Express JS, MongoDB

Description:

- Built a full-stack web application using the MERN stack with role-based access for users and admins. Implemented features like vehicle booking, Stripe payment integration, secure login with JWT, and review submission. Developed RESTful APIs, managed state with Context API, and designed a responsive UI using React and Tailwind CSS.

Outcome:

- Delivered a fully functional rental platform with role-based access.
- Automated email updates for booking confirmations.
- Ensured backend scalability with well-structured MongoDB schemas.
